CHAPTER III

	PAGE
The Author sent for to Court. The Queen buys him of his master the farmer, and presents him to the King. He disputes with his Majesty's great scholars. An apartment at Court provided for the Author. He is in high favour with the Queen. He stands up for the honour of his own country. His quarrels with the Queen's dwarf	88

CHAPTER IV

The country described. A proposal for correcting modern maps. The King's palace, and some account of the metropolis. The Author's way of travelling. The chief temple described . . .	99
---	----

CHAPTER V

Several adventures that happened to the Author. The execution of a criminal. The Author shows his skill in navigation . . .	104
---	-----

CHAPTER VI

Several contrivances of the Author to please the King and Queen. He shows his skill in music. The King enquires into the state of Europe, which the Author relates to him. The King's observations thereon	113
--	-----

CHAPTER VII

The Author's love of his country. He makes a proposal of much advantage to the King, which is rejected. The King's great ignorance in politics. The learning of that country very imperfect and confined. Their laws, and military affairs, and parties in the state	122
--	-----

CHAPTER VIII

The King and Queen make a progress to the frontiers. The Author attends them. The manner in which he leaves the country very particularly related. He returns to England	129
--	-----

GULLIVER'S TRAVELS

PART III

*A VOYAGE TO LAPUTA, BALNIBARBI, LUGGNAGG,
GLUBBDUBDRIB AND JAPAN*

CHAPTER I

	PAGE
The Author sets out on his third voyage, is taken by pirates. The malice of a Dutchman. His arrival at an island. He is received into Laputa	143

CHAPTER II

The humours and dispositions of the Laputians described. An account of their learning. Of the King, and his Court. The Author's reception there. The inhabitants subject to fear and disquietudes. An account of the women	149
--	-----

CHAPTER III

A phenomenon solved by modern philosophy and astronomy. The Laputians' great improvements in the latter. The King's method of suppressing insurrections	157
---	-----

CHAPTER IV

The Author leaves Laputa, is conveyed to Balnibarbi, arrives at the metropolis. A description of the metropolis, and the country adjoining. The Author hospitably received by a great lord. His conversation with that lord	163
---	-----

CHAPTER V

The Author permitted to see the grand academy of Lagado. The academy largely described. The arts wherein the professors employ themselves	170
---	-----

CHAPTER VI

A further account of the academy. The Author proposes some improvements, which are honourably received	177
--	-----

CONTENTS

CHAPTER VII

	PAGE
The Author leaves Lagado, arrives at Maldonada. No ship ready. He takes a short voyage to Glubbdubdrib. His reception by the Governor	183

CHAPTER VIII

A further account of Glubbdubdrib. Ancient and modern history corrected	188
---	-----

CHAPTER IX

The Author's return to Maldonada. Sails to the kingdom of Luggnagg. The Author confined. He is sent for to Court. The manner of his admittance. The King's great lenity to his subjects	194
---	-----

CHAPTER X

The Luggnaggians commended. A particular Description of the Struldbrugs, with many conversations between the Author and some eminent persons, upon that subject	198
---	-----

CHAPTER XI

The Author leaves Luggnagg, and sails to Japan. From thence he returns in a Dutch ship to Amsterdam, and from Amsterdam to England	207
--	-----

PART IV

A VOYAGE TO THE COUNTRY OF THE HOUYHNHMS

CHAPTER I

The Author sets out as captain of a ship. His men conspire against him, confine him a long time to his cabin. Set him ashore in an unknown land. He travels up into the country. The Yahoos, a strange sort of animal, described. The Author meets two Houyhnhnms	211
---	-----

CHAPTER II

	PAGE
The Author conducted by a Houyhnhnm to his house. The house described. The Author's reception. The food of the Houyhnhnms. The Author in distress for want of meat, is at last relieved. His manner of feeding in this country	218

CHAPTER III

The Author studious to learn the language; the Houyhnhnm, his master, assists in teaching him. The language described. Several Houyhnhnms of quality come out of curiosity to see the Author. He gives his master a short account of his voyage	224
---	-----

CHAPTER IV

The Houyhnhnm's notion of truth and falsehood. The Author's discourse disapproved by his master. The Author gives a more particular account of himself, and the accidents of his voyage	230
---	-----

CHAPTER V

The Author, at his master's commands, informs him of the state of England. The causes of war among the princes of Europe. The Author begins to explain the English constitution	236
---	-----

CHAPTER VI

A continuation of the state of England. The character of a first or chief minister of state in European Courts	243
--	-----

CHAPTER VII

The Author's great love of his native country. His master's observations upon the constitution and administration of England, as described by the Author, with parallel cases and comparisons. His master's observations upon human nature	249
--	-----

CONTENTS

xiii

CHAPTER VIII

PAGE

The Author relates several particulars of the Yahoos. The great virtues of the Houyhnhnms. The education and exercise of their youth. Their general assembly 256

CHAPTER IX

A grand debate at the general assembly of the Houyhnhnms, and how it was determined. The learning of the Houyhnhnms. Their buildings. Their manner of burials. The defectiveness of their language 261

CHAPTER X

The Author's economy, and happy life, among the Houyhnhnms. His great improvement in virtue, by conversing with them. Their conversations. The Author has notice given him by his master, that he must depart from the country. He falls into a swoon for grief; but submits. He contrives and finishes a canoe, by the help of a fellow servant, and puts to sea at a venture 266

CHAPTER XI

The Author's dangerous voyage. He arrives at New Holland, hoping to settle there. Is wounded with an arrow by one of the natives. Is seized and carried by force into a Portuguese ship. The great civilities of the captain. The Author arrives at England 276

CHAPTER XII

The Author's veracity. His design in publishing this work. His censure of those travellers who swerve from the truth. The Author clears himself from any sinister ends in writing. An objection answered. The method of planting colonies. His native country commended. The right of the crown to those countries described by the Author is justified. The difficulty of conquering them. The Author takes his last leave of the reader; proposeth his manner of living for the future; gives good advice, and concludeth 285

CHAPTER I

MY father had a small estate in Nottinghamshire; I was the third of five sons. He sent me to Emanuel College in Cambridge, at fourteen years old, where I resided three years, and applied myself close to my studies; but the charge of maintaining me (although I had a very scanty allowance) being too great for a narrow fortune, I was bound apprentice to Mr. James Bates, an eminent surgeon in London, with whom I continued four years; and my father now and then sending me small sums of money, I laid them out in learning navigation, and other parts of the mathematics, useful to those who intend to travel, as I always believed it would be some time or other my fortune to do. When I left Mr. Bates, I went down to my father; where, by the assistance of him and my uncle John, and some other relations, I got forty pounds, and a promise of thirty pounds a year to maintain me at Leyden: there I

studied physic two years and seven months, knowing it would be useful in long voyages.

Soon after my return from Leyden, I was recommended by my good master Mr. Bates, to be surgeon to the *Swallow*, Captain Abraham Pannell, commander; with whom I continued three years and a half, making a voyage or two into the Levant, and some other parts. When I came back, I resolved to settle in London, to which Mr. Bates, my master, encouraged me, and by him I was recommended to several patients. I took part of a small house in the Old Jewry; and being advised to alter my condition, I married Mrs. Mary Burton, second daughter to Mr. Edmund Burton, hosier, in Newgate Street, with whom I received four hundred pounds for a portion.

But, my good master Bates dying in two years after, and I having few friends, my business began to fail; for my conscience would not suffer me to imitate the bad practice of too many among my brethren. Having therefore consulted with my wife, and some of my acquaintance, I determined to go again to sea. I was surgeon successively in two ships, and made several voyages for six years to the East and West Indies, by which I got some addition to my fortune. My hours of leisure I spent in reading the best authors, ancient and modern, being always provided with a good number of books; and when I was ashore, in observing the manners and dispositions of the people, as well as learning their language, wherein I had a great facility by the strength of my memory.

The last of these voyages not proving very fortunate, I grew weary of the sea, and intended to stay at home with my wife and family. I removed from the Old Jewry to Fetter Lane, and from thence to Wapping, hoping to get business among the sailors; but it would not turn to account. After three years' expectation that things would mend, I accepted an advantageous offer from Captain William Pritchard, master of the *Antelope*, who was making

a voyage to the South Sea. We set sail from Bristol, May 4th, 1699, and our voyage at first was very prosperous.

It would not be proper, for some reasons, to trouble the reader with the particulars of our adventures in those seas: Let it suffice to inform him, that, in our passage from thence to the East Indies, we were driven by a violent storm to the north-west of Van Diemen's Land. By an observation we found ourselves in the latitude of 30 degrees 2 minutes south. Twelve of our crew were dead by immoderate labour, and ill food, the rest were in a very weak condition. On the fifth of November, which was the beginning of summer in those parts, the weather being very hazy, the seamen spied a rock, within half a cable's length of the ship; but the wind was so strong, that we were driven directly upon it, and immediately split. Six of the crew, of whom I was one, having let down the boat into the sea, made a shift to get clear of the ship and the rock. We rowed, by my computation, about three leagues, till we were able to work no longer, being already spent with labour while we were in the ship. We therefore trusted ourselves to the mercy of the waves, and in about half an hour the boat was upset by a sudden flurry from the north. What became of my companions in the boat, as well as of those who escaped on the rock, or were left in the vessel, I cannot tell; but conclude they were all lost. For my own part, I swam as fortune directed me, and was pushed forward by wind and tide. I often let my legs drop, and could feel no bottom: but when I was almost gone, and able to struggle no longer, I found myself within my depth; and by this time the storm was much abated. The declivity was so small, that I walked near a mile before I got to the shore, which I conjectured was about eight o'clock in the evening. I then advanced forward near half a mile, but could not discover any sign of houses or inhabitants; at least I was in so weak a condition that I did not observe them. I was extremely tired, and with that, and the heat

of the weather, and about half a pint of brandy that I drank as I left the ship, I found myself much inclined to sleep. I lay down on the grass, which was very short and soft, where I slept sounder than ever I remembered to have done in my life, and, as I reckoned, about nine hours; for when I awaked it was just daylight. I attempted to rise, but was not able to stir: for as I happened to lie on my back, I found my arms and legs were strongly fastened on each side to the ground; and my hair, which was long and thick, tied down in the same manner. I likewise felt several slender ligatures across my body, from my arm-pits to my thighs. I could only look upwards, the sun began to grow hot, and the light offended my eyes. I heard a confused noise about me, but, in the posture I lay, could see nothing except the sky. In a little time I felt something alive moving on my left leg, which advancing gently forward, over my breast, came almost up to my chin; when bending my eyes downward as much as I could, I perceived it to be a human creature not six inches high, with a bow and arrow in his hands, and a quiver at his back. In the meantime, I felt at least forty more of the same kind (as I conjectured) following the first. I was in the utmost astonishment, and roared so loud, that they all ran back in a fright; and some of them, as I was afterwards told, were hurt with the falls they got by leaping from my sides upon the ground. However, they soon returned, and one of them, who ventured so far as to get a full sight of my face, lifting up his hands and eyes by way of admiration, cried out in a shrill but distinct voice, *Hekinah degul*: the others repeated the same words several times, but I then knew not what they meant. I lay all this while, as the reader may believe, in great uneasiness; at length, struggling to get loose, I had the fortune to break the strings, and wrench out the pegs that fastened my left arm to the ground; for, by lifting it up to my face, I discovered the methods they had taken to bind me, and, at the same time, with a violent

pull, which gave me excessive pain, I a little loosened the strings that tied down my hair on the left side, so that I was just able to turn my head about two inches. But the creatures ran off a second time, before I could seize them; whereupon there was a great shout in a very shrill accent, and after it ceased, I heard one of them cry aloud, *Tolgo phonac*; when in an instant I felt above an hundred arrows discharged on my left hand, which pricked me like so many needles; and besides, they shot another flight into the air, as we do bombs in Europe, whereof many I suppose fell on my body (though I felt them not), and some on my face, which I immediately covered with my left hand. When this shower of arrows was over, I fell a groaning with grief and pain, and then striving again to get loose, they discharged another volley larger than the first, and some of them attempted with spears to stick me in the sides; but, by good luck, I had on me a buff jerkin, which they could not pierce. I thought it the most prudent method to lie still, and my design was to continue so till night, when my left hand being already loose, I could easily free myself: and as for the inhabitants, I had reason to believe I might be a match for the greatest army they could bring against me, if they were all of the same size with him that I saw. **But** fortune disposed otherways of me. When the people observed I was quiet, they discharged no more arrows: but, by the noise I heard, I knew their numbers increased; and about four yards from me, over against my right ear, I heard a knocking for above an hour, like that of people at work; when turning my head that way, as well as the pegs and strings would permit me, I saw a stage erected, about a foot and half from the ground, capable of holding four of the inhabitants, with two or three ladders to mount it: from whence one of them, who seemed to be a person of quality, made me a long speech, whereof I understood not one syllable. But I should have mentioned, that before the principal person began his oration, he cried out three

times, *Langro dehul san* (these words and the former were afterwards repeated and explained to me). Whereupon immediately about fifty of the inhabitants came and cut the strings that fastened the left side of my head, which gave me the liberty of turning it to the right, and of observing the person and gesture of him that was to speak. He appeared to be of a middle age, and taller than any of the other three who attended him, whereof one was a page that held up his train, and seemed to be somewhat longer than my middle finger; the other two stood one on each side to support him. He acted every part of an orator, and I could observe many periods of threatenings, and others of promises, pity, and kindness. I answered in a few words, but in the most submissive manner, lifting up my left hand and both my eyes to the sun, as calling him for a witness; and, being almost famished with hunger, having not eaten a morsel for some hours before I left the ship, I found the demands of nature so strong upon me, that I could not forbear shewing my impatience (perhaps against the strict rules of decency) by putting my finger frequently to my mouth, to signify that I wanted food. The Hurgo (for so they call a great lord, as I afterwards learnt) understood me very well. He descended from the stage, and commanded that several ladders should be applied to my sides, on which above an hundred of the inhabitants mounted, and walked towards my mouth, laden with baskets full of meat, which had been provided and sent thither by the king's orders, upon the first intelligence he received of me. I observed there was the flesh of several animals, but could not distinguish them by the taste. There were shoulders, legs, and loins, shaped like those of mutton, and very well dressed, but smaller than the wings of a lark. I eat them by two or three at a mouthful, and took three loaves at a time, about the bigness of musket bullets. They supplied me as they could, shewing a thousand marks of wonder and astonishment at my bulk and appetite. I then made

another sign that I wanted drink. They found by my eating, that a small quantity would not suffice me, and being a most ingenious people, they flung up with great dexterity one of their largest hogsheads, then rolled it towards my hand, and beat out the top; I drank it off at a draught, which I might well do, for it did not hold half a pint, and tasted like a small wine of Burgundy, but much more delicious. They brought me a second hogshead, which I drank in the same manner, and made signs for more; but they had none to give me. When I had performed these wonders, they shouted for joy, and danced upon my breast, repeating several times as they did at first, *Hekinah degul*. They made me a sign that I should throw down the two hogsheads, but first warning the people below to stand out of the way, crying aloud, *Borach mivola*, and when they saw the vessels in the air, there was an universal shout of *Hekinah degul*. I confess, I was often tempted, while they were passing backwards and forwards on my body, to seize forty or fifty of the first that came in my reach, and dash them against the ground. But the remembrance of what I had felt, which probably might not be the worst they could do, and the promise of honour I made them, for so I interpreted my submissive behaviour, soon drove out these imaginations. Besides, I now considered myself as bound by the laws of hospitality to a people who had treated me with so much expense and magnificence. However, in my thoughts, I could not sufficiently wonder at the intrepidity of these diminutive mortals, who durst venture to mount and walk upon my body, while one of my hands was at liberty, without trembling at the very sight of so prodigious a creature, as I must appear to them. After some time, when they observed that I made no more demands for meat, there appeared before me a person of high rank from his Imperial Majesty. His Excellency, having mounted on the small of my right leg, advanced forwards up to my face, with about

a dozen of his retinue. And producing his credentials under the Signet Royal, which he applied close to my eyes, spoke about ten minutes, without any signs of anger, but with a kind of determinate resolution; often pointing forwards, which, as I afterwards found, was towards the capital city, about half a mile distant, whither, it was agreed by his Majesty in council, that I must be conveyed. I answered in few words, but to no purpose, and made a sign with my hand that was loose, putting it to the other (but over his Excellency's head, for fear of hurting him or his train) and then to my own head and body, to signify that I desired my liberty. It appeared that he understood me well enough, for he shook his head by way of disapprobation, and held his hand in a posture, to shew that I must be carried as a prisoner. However, he made other signs to let me understand that I should have meat and drink enough, and very good treatment. Whereupon I once more thought of attempting to break my bonds; but again, when I felt the smart of their arrows, upon my face and hands, which were all in blisters, and many of the darts still sticking in them; and observing likewise that the number of my enemies increased, I gave tokens, to let them know that they might do with me what they pleased. Upon this, the Hurgo and his train withdrew, with much civility and cheerful countenances. Soon after, I heard a general shout, with frequent repetitions of the words, *Peplom selan*, and I felt great numbers of people on my left side, relaxing the cords to such a degree, that I was able to turn upon my right. But before this, they had daubed my face, and both my hands, with a sort of ointment very pleasant to the smell, which in a few minutes removed all the smart of their arrows. These circumstances, added to the refreshment I had received by their victuals and drink, which were very nourishing, disposed me to sleep. I slept about eight hours, as I was afterwards assured; and it was no wonder, for the physicians, by the

Emperor's order, had mingled a sleepy potion in the hogs-heads of wine.

It seems that, upon the first moment I was discovered sleeping on the ground after my landing, the Emperor had early notice of it by an express; and determined in council that I should be tied in the manner I have related (which was done in the night while I slept), that plenty of meat and drink should be sent to me, and a machine prepared to carry me to the capital city.

This resolution, perhaps, may appear very bold and dangerous, and I am confident, would not be imitated by any prince in Europe, on the like occasion; however, in my opinion, it was extremely prudent, as well as generous: for, supposing these people had endeavoured to kill me with their spears and arrows, while I was asleep, I should certainly have awaked with the first sense of smart, which might so far have roused my rage and strength, as to have enabled me to break the strings wherewith I was tied; after which, as they were not able to make resistance, so they could expect no mercy.

These people are most excellent mathematicians, and arrived to a great perfection in mechanics, by the countenance and encouragement of the Emperor, who is a renowned patron of learning. This prince hath several machines fixed on wheels, for the carriage of trees, and other great weights. He often builds his largest men-of-war, whereof some are nine feet long, in the woods where the timber grows, and has them carried on these engines three or four hundred yards to the sea. Five hundred carpenters and engineers were immediately set at work to prepare the greatest engine they had. It was a frame of wood raised three inches from the ground, about seven feet long, and four wide, moving upon twenty-two wheels. The shout I heard was upon the arrival of this engine, which, it seems, set out in four hours after my landing. It was brought parallel to me as I lay. But the principal difficulty was, to

raise and place me in this vehicle. Eighty poles, each of one foot high, were erected for this purpose, and very strong cords, of the bigness of pack-thread, were fastened by hooks to many bandages, which the workmen had girt round my neck, my hands, my body, and my legs. Nine hundred of the strongest men were employed to draw up these cords by many pulleys fastened on the poles, and thus, in less than three hours, I was raised, and flung into the engine, and there tied fast. All this I was told, for, while the whole operation was performing, I lay in a profound sleep, by the force of that soporiferous medicine infused into my liquor. Fifteen hundred of the Emperor's largest horses, each about four inches and an half high, were employed to draw me towards the Metropolis, which, as I said, was half a mile distant.

About four hours after we began our journey, I awaked by a very ridiculous accident; for the carriage being stopped a while to adjust something that was out of order, two or three of the young natives had the curiosity to see how I looked when I was asleep; they climbed up into the engine, and advancing very softly to my face, one of them, an officer in the Guards, put the sharp end of his half-pike a good way up into my left nostril, which tickled my nose like a straw, and made me sneeze violently: whereupon they stole off unperceived, and it was three weeks before I knew the cause of my awaking so suddenly. We made a long march the remaining part of that day, and rested at night with five hundred guards on each side of me, half with torches, and half with bows and arrows, ready to shoot me, if I should offer to stir. The next morning at sun-rise we continued our march, and arrived within two hundred yards of the city gates about noon. The Emperor, and all his court, came out to meet us, but his great officers would by no means suffer his Majesty to endanger his person by mounting on my bo^{dy}.

At the place where the carriage stopped, there stood

an ancient temple, esteemed to be the largest in the whole kingdom, which, having been polluted some years before by an unnatural murder, was, according to the zeal of those people, looked on as profane, and therefore had been applied to common use, and all the ornaments and furniture carried away. In this edifice it was determined I should lodge. The great gate fronting to the north, was about four feet high, and almost two feet wide, through which I could easily creep. On each side of the gate was a small window, not above six inches from the ground: into that on the left side, the King's smith conveyed fourscore and eleven chains, like those that hang to a lady's watch in Europe, and almost as large, which were locked to my left leg, with six and thirty padlocks. Over against this temple, on t'other side of the great highway, at twenty feet distance, there was a turret at least five feet high. Here the Emperor ascended, with many principal lords of his court, to have an opportunity of viewing me, as I was told, for I could not see them. It was reckoned, that above an hundred thousand inhabitants came out of the town upon the same errand; and, in spite of my guards, I believe there could not be fewer than ten thousand, at several times, who mounted my body by the help of ladders. But a proclamation was soon issued to forbid it, upon pain of death. When the workmen found it was impossible for me to break loose, they cut all the strings that bound me; whereupon I rose up with as melancholy a disposition as ever I had in my life. But the noise and astonishment of the people, at seeing me rise and walk, are not to be expressed. The chains that held my left leg, were about two yards long, and gave me not only the liberty of walking backwards and forwards in a semi-circle, but, being fixed within four inches of the gate, allowed me to creep in, and lie at my full length in the temple.

CHAPTER II

WHEN I found myself on my feet I looked about me, and must confess I never beheld a more entertaining prospect. The country round appeared like a continual garden, and the enclosed fields, which were generally forty feet square, resembled so many beds of flowers. These fields were intermingled with woods of half a stang, and the tallest trees, as I could judge, appeared to be seven feet high. I viewed the town on my left hand, which looked like the painted scene of a city in a theatre.

The Emperor was already descended from the tower, and advancing on horseback towards me, which had like to have cost him dear; for the beast, though very well trained, yet wholly unused to such a sight, which appeared as if a mountain moved before him, reared up on his hinder feet: but that Prince, who is an excellent horseman, kept his seat, till his attendants ran in, and held the bridle, while his Majesty had time to dismount. When he alighted, he surveyed me round with great admiration, but kept without the length of my chain. He ordered his cooks and butlers, who were already prepared, to give me victuals and drink, which they pushed forward in a sort of vehicles on wheels, till I could reach them. I took these vehicles, and soon emptied them all; twenty of them were filled with meat, and ten with liquor. Each of the former afforded me two or three good mouthfuls, and I emptied the liquor of ten vessels, which was contained in earthen vials, into one vehicle, drinking it off at a draught, and so I did with the rest. The Empress and young Princes of the blood, of both sexes, attended by many ladies, sat at some distance in their chairs; but, upon the accident that happened to the Emperor's horse, they alighted, and came near his

person, which I am now going to describe. He is taller by almost the breadth of my nail, than any of his court, which, alone, is enough to strike an awe into the beholders. His features are strong and masculine, with an Austrian lip and arched nose, his complexion olive, his countenance erect, his body and limbs well proportioned, all his motions graceful, and his deportment majestic. He was then past his prime, being twenty-eight years and three quarters old, of which he had reigned about seven, in great felicity, and generally victorious. For the better convenience of beholding him, I lay on my side, so that my face was parallel to his, and he stood but three yards off: however, I had him since many times in my hand, and, therefore, cannot be deceived in the description. His dress was very plain and simple, and the fashion of it, between the Asiatic and the European: but he had on his head a light helmet of gold, adorned with jewels, and a plume on the crest. He held his sword drawn in his hand, to defend himself, if I should happen to break loose; it was almost three inches long, the hilt and scabbard were gold enriched with diamonds. His voice was shrill, but very clear and articulate, and I could distinctly hear it when I stood up. The ladies and courtiers were all most magnificently clad, so that the spot they stood upon, seemed to resemble a petticoat spread on the ground, embroidered with figures of gold and silver. His Imperial Majesty spoke often to me, and I returned answers, but neither of us could understand a syllable. There were several of his priests and lawyers present (as I conjectured by their habits) who were commanded to address themselves to me, and I spoke to them in as many languages as I had the least smattering of, which were High and Low Dutch, Latin, French, Spanish, Italian, and *Lingua Franca*; but all to no purpose. After about two hours the court retired, and I was left with a strong guard, to prevent the impertinence, and probably, the malice of the rabble, who were very impatient to crowd about me as

near as they durst, and some of them had the impudence to shoot their arrows at me as I sat on the ground by the door of my house, whereof one very narrowly missed my left eye. But the colonel ordered six of the ringleaders to be seized, and thought no punishment so proper, as to deliver them bound into my hands, which some of his soldiers accordingly did, pushing them forwards with the butt ends of their pikes into my reach; I took them all in my right hand, put five of them into my coat pocket, and as to the sixth, I made a countenance as if I would eat him alive. The poor man squalled terribly, and the colonel and his officers were in much pain, especially when they saw me take out my penknife: but I soon put them out of fear; for, looking mildly, and immediately cutting the strings he was bound with, I set him gently on the ground, and away he ran. I treated the rest in the same manner, taking them, one by one, out of my pocket, and I observed both the soldiers and people were obliged at this mark of my clemency, which was represented very much to my advantage at court.

Towards night I got with some difficulty into my house, where I lay on the ground, and continued to do so about a fortnight; during which time, the Emperor gave orders to have a bed prepared for me. Six hundred beds of the common measure were brought in carriages, and worked up in my house. An hundred and fifty of their beds, sewn together, made up the breadth and length; and these were four double, which, however, kept me but very indifferently from the hardness of the floor, that was of smooth stone. By the same computation, they provided me with sheets, blankets, and coverlets, tolerable enough for one who had been so long inured to hardships.

As the news of my arrival spread through the kingdom, it brought prodigious numbers of rich, idle, and curious people to see me, so that the villages were almost emptied, and great neglect of tillage and household affairs must

have ensued, if his Imperial Majesty had not provided, by several proclamations and orders of State, against this inconveniency. He directed that those who had already beheld me should return home, and not presume to come within fifty yards of my house, without licence from court; whereby the Secretaries of State got considerable fees.

In the meantime, the Emperor had frequent councils, to debate what course should be taken with me; and, I was afterwards assured by a particular friend, a person of great quality, who was looked upon to be as much in the secret as any, that the court was under many difficulties concerning me. They apprehended my breaking loose, that my diet would be very expensive, and might cause a famine. Sometimes they determined to starve me, or at least to shoot me in the face and hands with poisoned arrows, which would soon despatch me; but again they considered, that the stench of so large a carcase might produce a plague in the metropolis, and probably spread through the whole kingdom. In the midst of these consultations, several officers of the army went to the door of the great council chamber, and two of them, being admitted, gave an account of my behaviour to the six criminals above mentioned, which made so favourable an impression in the breast of his Majesty, and the whole board, in my behalf, that an Imperial Commission was issued out, obliging all the villages, nine hundred yards round the city, to deliver in every morning six beeves, forty sheep, and other victuals, for my sustenance; together with a proportionable quantity of bread, and wine, and other liquors; for the due payment of which, his Majesty gave assignments upon his treasury. For this prince lives chiefly upon his own demesnes, seldom, except upon great occasions, raising any subsidies upon his subjects, who are bound to attend him in his wars, at their own expense. An establishment was also made of six hundred persons to be my domestics, who had board wages allowed for their

maintenance, and tents built for them very conveniently on each side of my door. It was likewise ordered, that three hundred tailors should make me a suit of clothes, after the fashion of the country: that six of his Majesty's greatest scholars should be employed to instruct me in their language, and, lastly, that the Emperor's horses, and those of the nobility, and troops of guards, should be frequently exercised in my sight, to accustom themselves to me. All these orders were duly put in execution, and, in about three weeks, I made a great progress in learning their language, during which time, the Emperor frequently honoured me with his visits, and was pleased to assist my masters in teaching me. We began already to converse together in some sort; and the first words I learnt were to express my desire that he would please to give me my liberty, which I every day repeated on my knees. His answer, as I could apprehend it, was, that this must be a work of time, not to be thought on without the advice of his council, and that first I must *Lumos kelmin peffo defmar lon Emposo*; that is, swear a peace with him and his kingdom. However, that I should be used with all kindness; and he advised me to acquire, by my patience and discreet behaviour, the good opinion of himself and his subjects. He desired I would not take it ill, if he gave orders to certain proper officers to search me; for probably I might carry about me several weapons, which must needs be dangerous things, if they answered the bulk of so prodigious a person. I said, his Majesty should be satisfied, for I was ready to strip myself, and turn up my pockets before him. This I delivered, part in words, and part in signs. He replied, that by the laws of the kingdom I must be searched by two of his officers; that he knew this could not be done without my consent and assistance; that he had so good an opinion of my generosity and justice, as to trust their persons in my hands; that whatever they took from me, should be returned when I left the country, or

paid for at the rate which I would set upon them. I took up the two officers in my hands, put them first into my coat pockets, and then into every other pocket about me, except my two fobs, and another secret pocket I had no mind should be searched, wherein I had some little necessities that were of no consequence to any but myself. In one of my fobs there was a silver watch, and in the other a small quantity of gold in a purse. These gentlemen, having pen, ink, and paper, about them, made an exact inventory of everything they saw, and, when they had done, desired I would set them down, that they might deliver it to the Emperor. This inventory I afterwards translated into English, and is word for word as follows:—

“ *Imprimis*, In the right coat pocket of the ‘ Great Man-Mountain ’ (for so I interpret the *Quinbus Flestrin*), after the strictest search, we found only one great piece of coarse cloth, large enough to be a foot-cloth for your Majesty’s chief room of state. In the left pocket we saw a huge silver chest, with a cover of the same metal, which we, the searchers, were not able to lift. We desired it should be opened, and one of us stepping into it, found himself up to the mid leg in a sort of dust, some part whereof, flying up to our faces, set us both a sneezing for several times together. In his right waistcoat pocket, we found a prodigious bundle of white, thin substances, folded one over another, about the bigness of three men, tied with a strong cable, and marked with black figures; which we humbly conceive to be writings, every letter almost half as large as the palm of our hands. In the left there was a sort of engine, from the back of which were extended twenty long poles, resembling the palisadoes before your Majesty’s court; wherewith we conjecture the Man-Mountain combs his head, for we did not always trouble him with questions, because we found it a great difficulty to make him understand us. In the large pocket on the right side of his

middle cover (so I translate the word *Ranfu-Lo*, by which they meant my breeches), we saw a hollow pillar of iron, about the length of a man, fastened to a strong piece of timber, larger than the pillar; and upon one side of the pillar were huge pieces of iron sticking out, cut into strange figures, which we know not what to make of. In the left pocket, another engine of the same kind. In the smaller pocket, on the right side, were several round flat pieces of white and red metal, of different bulk; some of the white, which seemed to be silver, were so large and heavy, that my comrade and I could hardly lift them. In the left pocket were two black pillars, irregularly shaped; we could not, without difficulty, reach the top of them, as we stood at the bottom of his pocket. One of them was covered, and seemed all of a piece; but, at the upper end of the other, there appeared a white round substance, about twice the bigness of our heads. Within each of these was enclosed a prodigious plate of steel; which, by our orders, we obliged him to shew us, because we apprehended they might be dangerous engines. He took them out of their cases, and told us, that in his own country, his practice was to shave his beard with one of these, and to cut his meat with the other. There were two pockets which we could not enter: these he called his fobs; they were two large slits cut into the top of his middle cover, but squeezed close by the pressure of his belly. Out of the right fob hung a great silver chain, with a wonderful kind of engine at the bottom. We directed him to draw out whatever was fastened to that chain; which appeared to be a globe, half silver, and half of some transparent metal: for on the transparent side, we saw certain strange figures, circularly drawn, and thought we could touch them, till we found our fingers stopped by that lucid substance. He put this engine to our ears, which made an incessant noise, like that of a water-mill. And we conjecture, it is either some unknown animal, or the god that he worships: but we are

more inclined to the latter opinion, because he assured us (if we understood him right, for he expressed himself very imperfectly) that he seldom did anything without consulting it. He called it his oracle, and said it pointed out the time for every action of his life. From the left fob he took out a net almost large enough for a fisherman, but contrived to open and shut like a purse, and served him for the same use: we found therein several massy pieces of yellow metal, which, if they be real gold, must be of immense value.

“ Having thus, in obedience to your Majesty’s commands, diligently searched all his pockets, we observed a girdle about his waist, made of the hide of some prodigious animal, from which, on the left side, hung a sword of the length of five men; and on the right, a bag or pouch, divided into two cells, each cell capable of holding three of your Majesty’s subjects. In one of these cells were several globes, or balls, of a most ponderous metal, about the bigness of our heads, and required a strong hand to lift them. The other cell contained a heap of certain black grains, but of no great bulk or weight, for we could hold above fifty of them in the palms of our hands.

“ This is an exact inventory of what we found about the body of the Man-Mountain, who used us with great civility, and due respect to your Majesty’s commission. Signed and sealed, on the fourth day of the eighty-ninth moon of your Majesty’s auspicious reign.

“ CLEFRIN FRELOCK, MARSI FRELOCK.”

When this inventory was read over to the Emperor, he directed me, although in very gentle terms, to deliver up the several particulars. He first called for my scimitar, which I took out, scabbard and all. In the meantime, he ordered three thousand of his choicest troops (who then attended him) to surround me at a distance, with their bows and arrows just ready to discharge: but I did not

observe it, for mine eyes were wholly fixed upon his Majesty. He then desired me to draw my scimitar, which, although it had got some rust by the sea-water, was in most parts exceeding bright. I did so, and immediately all the troops gave a shout, between terror and surprise; for the sun shone clear, and the reflection dazzled their eyes, as I waved the scimitar to and fro in my hand. His Majesty, who is a most magnanimous prince, was less daunted than I could expect; he ordered me to return it into the scabbard, and cast it on the ground as gently as I could, about six feet from the end of my chain. The next thing he demanded, was one of the hollow iron pillars, by which he meant my pocket pistols. I drew it out, and at his desire, as well as I could, expressed to him the use of it; and charging it only with powder, which, by the closeness of my pouch, happened to escape wetting in the sea (an inconvenience against which all prudent mariners take special care to provide), I first cautioned the Emperor not to be afraid, and then I let it off into the air. The astonishment here was much greater than at the sight of my scimitar. Hundreds fell down, as if they had been struck dead; and even the Emperor, although he stood his ground, could not recover himself in some time. I delivered up both my pistols in the same manner as I had done my scimitar, and then my pouch of powder and bullets; begging him, that the former might be kept from the fire, for it would kindle with the smallest spark, and blow up his imperial palace into the air. I likewise delivered up my watch, which the Emperor was very curious to see, and commanded two of his tallest yeomen of the guards to bear it on a pole upon their shoulders, as dray-men in England do a barrel of ale. He was amazed at the continual noise it made, and the motion of the minute-hand, which he could easily discern (for their sight is much more acute than ours), and asked the opinions of his learned men about him, which were various and remote, as the reader may well imagine with-

out my repeating; although, indeed, I could not very perfectly understand them. I then gave up my silver and copper money, my purse with nine large pieces of gold, and some smaller ones; my knife and razor, my comb and silver snuff-box, my handkerchief, and journal-book. My scimitar, pistols, and pouch were conveyed in carriages to his Majesty's stores; but the rest of my goods were returned me.

I had, as I before observed, one private pocket which escaped their search, wherein there was a pair of spectacles (which I sometimes use for the weakness of my eyes), a pocket perspective, and several other little conveniences, which being of no consequence to the Emperor, I did not think myself bound in honour to discover, and I apprehended they might be lost or spoiled, if I ventured them out of my possession.

CHAPTER III

My gentleness and good behaviour had gained so far on the Emperor and his court, and indeed upon the army and people in general, that I began to conceive hopes of getting my liberty in a short time. I took all possible methods to cultivate this favourable disposition. The natives came, by degrees, to be less apprehensive of any danger from me. I would sometimes lie down and let five or six of them dance on my hand; and, at last, the boys and girls would venture to come and play at hide and seek in my hair. I had now made a good progress in understanding and speaking their language. The Emperor had a mind, one day, to entertain me with several of the country shows, wherein they exceed all nations I have known, both for dexterity and magnificence. I was diverted with none so much as that of the rope-dancers performed upon a slender white thread, extended about two feet, and twelve inches from the ground. Upon which I shall desire liberty, with the reader's patience, to enlarge a little.

This diversion is only practised by those persons who are candidates for great employments, and high favour at court. They are trained in this art from their youth, and are not always of noble birth, or liberal education. When a great office is vacant, either by death or disgrace (which often happens), five or six of those candidates petition the Emperor to entertain his Majesty and the court with a dance on the rope, and whoever jumps the highest, without falling, succeeds in the office. Very often the chief ministers themselves are commanded to shew their skill, and to convince the Emperor that they have not lost their faculty. Flimnap, the treasurer, is allowed to cut a caper on the strait rope at least an inch higher than any other lord in

the whole empire. I have seen him do the somerset several times together, upon a trencher fixed on the rope, which is no thicker than a common pack-thread in England. My friend Reldresal, principal secretary for private affairs, is, in my opinion, if I am not partial, the second after the treasurer; the rest of the great officers are much upon a par.

These diversions are often attended with fatal accidents, whereof great numbers are on record. I myself have seen two or three candidates break a limb. But the danger is much greater when the ministers themselves are commanded to show their dexterity; for, by contending to excel themselves and their fellows, they strain so far, that there is hardly one of them who hath not received a fall, and some of them two or three. I was assured, that, a year or two before my arrival, Flimnap would have infallibly broke his neck, if one of the king's cushions, that accidentally lay on the ground, had not weakened the force of his fall.

There is likewise another diversion, which is only shewn before the Emperor and Empress, and first minister, upon particular occasions. The Emperor lays on the table three fine silken threads of six inches long; one is blue, the other red, and the third green. These threads are proposed as prizes for those persons whom the Emperor hath a mind to distinguish by a peculiar mark of his favour. The ceremony is performed in his Majesty's great chamber of state, where the candidates are to undergo a trial of dexterity very different from the former, and such as I have not observed the least resemblance of in any other country of the old or new world. The Emperor holds a stick in his hands, both ends parallel to the horizon, while the candidates advancing, one by one, sometimes leap over the stick, sometimes creep under it backwards and forwards several times, according as the stick is advanced or depressed. Sometimes the Emperor holds one end of the

stick, and his first minister the other; sometimes the minister has it entirely to himself. Whoever performs his part with most agility, and holds out the longest in leaping and creeping, is rewarded with the blue-coloured silk, the red is given to the next, and the green to the third, which they all wear girt twice round about the middle, and you see few great persons about this court who are not adorned with one of these girdles.

The horses of the army, and those of the royal stables, having been daily led before me, were no longer shy, but would come up to my very feet without starting. The riders would leap them over my hand as I held it on the ground, and one of the Emperor's huntsmen, upon a large courser, took my foot, shoe and all: which was, indeed, a prodigious leap. I had the good fortune to divert the Emperor, one day, after a very extraordinary manner: I desired he would order several sticks of two feet high, and the thickness of an ordinary cane, to be brought me; whereupon his Majesty commanded the master of his woods to give directions accordingly, and the next morning six woodmen arrived with as many carriages, drawn by eight horses to each. I took nine of these sticks, and fixing them firmly in the ground, in a quadrangular figure, two feet and a half square, I took four other sticks, and tied them parallel at each corner, about two feet from the ground; then I fastened my handkerchief to the nine sticks that stood erect, and extended it on all sides till it was as tight as the top of a drum; and the four parallel sticks, rising about five inches higher than the handkerchief, served as ledges on each side. When I had finished my work, I desired the Emperor to let a troop of his best horse, twenty-four in number, come and exercise upon this plain. His Majesty approved of the proposal, and I took them up one by one in my hands, ready mounted and armed, with the proper officers to exercise them. As soon as they got in order, they divided into two parties, performed mock

skirmishes, discharged blunt arrows, drew their swords, fled and pursued, attacked and retired, and in short discovered the best military discipline I ever beheld. The parallel sticks secured them and their horses from falling over the stage; and the Emperor was so much delighted that he ordered this entertainment to be repeated several days, and once was pleased to be lifted up, and give the word of command; and, with great difficulty, persuaded even the Empress herself to let me hold her in her close chair within two yards of the stage, from whence she was able to take a full view of the whole performance. It was by good fortune that no ill accident happened in these entertainments, only once a fiery horse, that belonged to one of the captains, pawing with his hoof, struck a hole in my handkerchief, and his foot slipping, he overthrew his rider and himself; but I immediately relieved them both, and covering the hole with one hand, I set down the troop with the other, in the same manner as I took them up. The horse that fell was strained in the left shoulder, but the rider got no hurt, and I repaired my handkerchief as well as I could; however, I would not trust to the strength of it any more in such dangerous enterprises.

About two or three days before I was set at liberty, as I was entertaining the court with these kind of feats, there arrived an express to inform his Majesty, that some of his subjects, riding near the place where I was first taken up, had seen a great black substance lying on the ground, very oddly shaped, extended its edges round as wide as his Majesty's bed-chamber, and rising up in the middle as high as a man; that it was no living creature, as they at first apprehended, for it lay on the grass without motion; and some of them had walked round it several times: that, by mounting upon each other's shoulders, they had got to the top, which was flat and even, and, stamping upon it, they found it was hollow within; that they humbly conceived it might be something belonging to the Man-Mountain;

and if his Majesty pleased, they would undertake to bring it with only five horses. I presently knew what they meant, and was glad at heart to receive this intelligence. It seems upon my first reaching the shore, after our shipwreck, I was in such confusion, that, before I came to the place where I went to sleep, my hat, which I had fastened with a string to my head while I was rowing, and had stuck on all the time I was swimming, fell off after I came to land; the string, as I conjecture, breaking by some accident which I never observed, but thought my hat had been lost at sea. I intreated his Imperial Majesty to give orders it might be brought to me as soon as possible, describing to him the use and the nature of it; and the next day the waggoners arrived with it, but not in a very good condition; they had bored two holes in the brim, within an inch and a half of the edge, and fastened two hooks in the holes; these hooks were tied by a long cord to the harness, and thus my hat was dragged along for above half an English mile; but, the ground in that country being extremely smooth and level, it received less damage than I expected.

Two days after this adventure, the Emperor having ordered that part of his army, which quarters in and about his metropolis, to be in readiness, took a fancy of diverting himself in a very singular manner: he desired I would stand like a colossus, with my legs as far asunder as I conveniently could; he then commanded his general (who was an old experienced leader, and a great patron of mine) to draw up the troops in close order, and march them under me; the foot by twenty-four in a breast, and the horse by sixteen, with drums beating, colours flying, and pikes advanced. This body consisted of three thousand foot, and a thousand horse.

I had sent so many memorials and petitions for my liberty, that his Majesty at length mentioned the matter first in the cabinet, and then in a full council; where it was opposed by none, except Skyresh Bolgolam, who was

THE EMPEROR OF LILLIPUT REVIEWS HIS TROOPS

pleased, without any provocation, to be my mortal enemy. But it was carried against him by the whole board, and confirmed by the Emperor. That minister was Galbet, or Admiral of the realm, very much in his master's confidence, and a person well versed in affairs, but of a morose and sour complexion. However, he was at length persuaded to comply; but prevailed that the articles and conditions upon which I should be set free, and to which I must swear, should be drawn up by himself. These articles were brought to me by Skyresh Bolgolam in person, attended by two under-secretaries, and several persons of distinction. After they were read, I was demanded to swear to the performance of them; first in the manner of my own country, and afterwards in the method prescribed by their laws, which was to hold my right foot in my left hand, and to place the middle finger of my right hand on the crown of my head, and my thumb on the tip of my right ear. But, because the reader may be curious to have some idea of the style and manner of expression peculiar to that people, as well as to know the articles upon which I recovered my liberty, I have made a translation of the whole instrument, word for word, as near as I was able, which I here offer to the public.

“GOLBASTO MOMAREN EVLAME GURDILO SHEFIN MULLY ULLY GUE, most mighty Emperor of Lilliput, delight and terror of the universe, whose dominions extend five thousand blustrugs (about twelve miles in circumference), to the extremities of the globe; monarch of all monarchs, taller than the sons of men; whose feet press down to the center, and whose head strikes against the sun; at whose nod the princes of the earth shake their knees; pleasant as the spring, comfortable as the summer, fruitful as autumn, dreadful as winter. His most sublime Majesty proposeth to the Man-Mountain, lately arrived to our celestial dominions, the following articles, which, by a solemn oath, he shall be obliged to perform:

" 1st. The Man-Mountain shall not depart from our dominions without our licence under our great seal.

" 2d. He shall not presume to come into our metropolis without our express order; at which time the inhabitants shall have two hours warning to keep within their doors.

" 3d. The said Man-Mountain shall confine his walks to our principal high roads, and not offer to walk or lie down in a meadow or field of corn.

" 4th. As he walks the said roads he shall take the utmost care not to trample upon the bodies of any of our loving subjects, their horses, or carriages, nor take any of our subjects into his hands, without their own consent.

" 5th. If an express requires extraordinary despatch, the Man-Mountain shall be obliged to carry in his pocket the messenger and horse a six days' journey once in every moon, and return the said messenger back (if so required) safe to our imperial presence.

" 6th. He shall be our ally against our enemies in the Island of Blefuscu, and do his utmost to destroy their fleet, which is now preparing to invade us.

" 7th. That the said Man-Mountain shall, at his times of leisure, be aiding and assisting to our workmen, in helping to raise certain great stones, towards covering the wall of the principal park, and other our royal buildings.

" 8th. That the said Man-Mountain shall, in two moons time, deliver in an exact survey of the circumference of our dominions, by a computation of his own paces round the coast.

" Lastly, That, upon his solemn oath to observe all the above articles, the said Man-Mountain shall have a daily allowance of meat and drink sufficient for the support of 1724 of our subjects, with free access to our royal person, and other marks of our favour. Given at our palace at Belfaborac, the twelfth day of the ninety-first moon of our reign."

I swore and subscribed to these articles with great cheerfulness and content, although some of them were not so honourable as I could have wished; which proceeded wholly from the malice of Skyresh Bolgolam, the high admiral; whereupon my chains were immediately unlocked, and I was at full liberty; the Emperor himself in person did me the honour to be by at the whole ceremony. I made my acknowledgments, by prostrating myself at his Majesty's feet, but he commanded me to rise; and after many gracious expressions, which, to avoid the censure of vanity, I shall not repeat, he added that he hoped I should prove a useful servant, and well deserve all the favours he had already conferred upon me, or might do for the future.

The reader may please to observe, that, in the last article for the recovery of my liberty, the Emperor stipulates to allow me a quantity of meat and drink sufficient for the support of 1724 Lilliputians. Some time after, asking a friend at court, how they came to fix on that determinate number, he told me that his Majesty's mathematicians, having taken the height of my body by the help of a quadrant, and finding it to exceed theirs in the proportion of twelve to one, they concluded, from the similarity of their bodies, that mine must contain, at least, 1724 of theirs, and, consequently, would require as much food as was necessary to support that number of Lilliputians. By which, the reader may conceive an idea of the ingenuity of that people, as well as the prudent and exact economy of so great a prince.

CHAPTER IV

THE first request I made, after I had obtained my liberty, was that I might have licence to see Mildendo, the metropolis; which the Emperor easily granted me, but with a special charge to do no hurt either to the inhabitants or their houses. The people had notice by proclamation of my design to visit the town. The wall which encompassed it is two feet and a half high, and at least eleven inches broad, so that a coach and horses may be driven very safely round it; and it is flanked with strong towers, at ten feet distance. I stepped over the great Western Gate, and passed very gently and sideling through the two principal streets, only in my short waistcoat, for fear of damaging the roofs and eaves of the houses with the skirts of my coat. I walked with the utmost circumspection, to avoid treading on any stragglers that might remain in the streets, although the orders were strict that all people should keep in their houses at their own peril. The garret-windows and tops of houses were so crowded with spectators that I thought, in all my travels, I had not seen a more populous place. The city is an exact square, each side of the wall being five hundred feet long. The two great streets, which run cross, and divide it into four quarters, are five feet wide. The lanes and alleys, which I could not enter, but only viewed them as I passed, are from twelve to eighteen inches. The town is capable of holding five hundred thousand souls. The houses are from three to five stories. The shops and markets well provided.
